

COSMOCATZ - Whitepaper

1. Introduction

COSMOCATZ is a narrative-driven memecoin and storytelling ecosystem built on the Solana blockchain. Inspired by cinematic sci-fi aesthetics and decentralized culture, the project blends community-driven lore, AI-generated visuals, on-chain governance, and interactive quests into one cohesive Meowverse.

2. Vision

The vision of COSMOCATZ is to create a decentralized, narrative-first universe where token holders shape the destiny of a stranded feline alien race. Through interactive storytelling, DAO proposals, and gamified experiences, COSMOCATZ redefines what a memecoin can be.

3. Tokenomics

- Token: \$COSMOCATZ (CCTZ)
- Supply: 10,000,000,000 (10B)
- Network: Solana
- Airdrop: 5B allocated to early adopters and community members
- Liquidity: Launched on Raydium
- Contract Address: Public and verifiable on Solana blockchain

4. DAO & Governance

COSMOCATZ DAO is hosted on Realms (Solana DAO infrastructure). Token holders can vote on:

- Lore progression and character arcs
- Community quests and events
- Visual content approval (AI videos, Sora renders)
- Treasury allocation and project direction

5. Visual Direction

COSMOCATZ uses hyper-realistic 3D visuals generated via Sora and Midjourney v6. Design is inspired by Mass Effect, Love Death & Robots, and Dead Space. Characters are humanoid alien cats in chromed armor, illuminated by Solana holograms, and set in a dark sci-fi universe aboard the Purrship-69.

6. Roadmap

Q2 2025:

- Launch liquidity pool and DAO
- Start lore-based voting cycles
- Initiate airdrop distribution

Q3 2025:

- Launch animated series pilot using Sora
- Expand character lore via interactive quests
- Develop staking and character progression platform

Q4 2025:

- Integrate COSMOCATZ into GameFi
- Begin production on the interactive 3D game (Unity)
- Explore cross-chain integrations and IP licensing
